A BILL FOR AN ACT

RELATING TO HEALTH CARE.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

PART I

SECTION 1. The legislature finds that Hawaii has long been a leader in advancing reproductive rights and advocating for access to affordable and comprehensive sexual and reproductive health care without discrimination. However, gaps in coverage and care still exist, and Hawaii benefits and protections have been threatened for four years by a hostile federal administration that has attempted to restrict and repeal the federal Patient Protection and Affordable Care Act and limit access to sexual and reproductive health care. The Trump administration has made it increasingly difficult for insurers to cover abortion care and has assembled a Supreme Court that may restrict abortion access and eliminate the Patient Protection and Affordable Care Act in the near future.

The legislature further finds that a host of the Patient Protection and Affordable Care Act provisions could soon be eliminated, including coverage of preventive care with no
H.B. NO. 249

patient cost-sharing. These changes would force people in Hawaii to pay more health care costs out-of-pocket, delay or forego care, and risk their health and economic security. The COVID-19 pandemic has already cost thousands of people their jobs and health insurance. Forcing Hawaii residents to pay more for preventive care would create a new public health crisis in the wake of a global pandemic.

The legislature further finds that access to sexual and reproductive health care is critical for the health and economic security of all people in Hawaii, particularly during a recession. Investing in no-cost preventive services will ultimately save Hawaii money because providing preventive care avoids the need for more expensive treatment and management in the future. No-cost preventive services would also support families in financial difficulty by helping people remain healthy and plan their families in a way that is appropriate for them. Ensuring that Hawaii's people receive comprehensive, client-centered, and culturally-competent sexual and reproductive health care is prudent economic policy that will improve the overall health of our States communities.
In order to guarantee essential health benefits, safeguard access to abortion, limit out-of-pocket costs, and improve overall access to care, the legislature finds that it is vital to preserve certain aspects of the Patient Protection and Affordable Care Act and ensure access to health care for residents of Hawaii.

Accordingly, the purpose of this Act is to ensure comprehensive coverage for sexual and reproductive health care services, including family planning and abortion, for all people in Hawaii.

PART II

SECTION 2. Chapter 431, Hawaii Revised Statutes, is amended by adding two new sections to part I of article 10A to be appropriately designated and to read as follows:

For the purposes of this section and where appropriate, a "well-woman visit" shall include other preventive services as listed in this section; provided that if several visits are needed to obtain all necessary recommended preventive services, depending upon a woman's health status, health needs, and other risk factors, coverage shall apply to each of the necessary visits;

(b) An insurer shall not impose any cost-sharing requirements, including copayments, coinsurance, or deductibles, on a policyholder or an individual covered by the policy with respect to the coverage and benefits required by this section, except to the extent that coverage of particular services without cost-sharing would disqualify a high-deductible health plan from eligibility for a health savings account pursuant to title 26 United States Code section 223. For a qualifying high-deductible health plan, the insurer shall establish the plan's cost-sharing for the coverage provided pursuant to this section at the minimum level necessary to preserve the insured's ability to claim tax-exempt contributions and withdrawals from the insured's health savings account under title 26 United States Code section 223.

(1) Experimental or investigational treatments;
(2) Clinical trials or demonstration projects;
(3) Treatments that do not conform to acceptable and customary standards of medical practice; or
(4) Treatments for which there is insufficient data to determine efficacy.

(f) If services, drugs, devices, products, or procedures required by this section are provided by an out-of-network provider, the insurer shall cover the services, drugs, devices, products, or procedures without imposing any cost-sharing requirement on the policyholder if:

(1) There is no in-network provider to furnish the service, drug, device, product, or procedure that
meets the requirements for network adequacy under section 431:26-103; or

(2) An in-network provider is unable or unwilling to provide the service, drug, device, product, or procedure in a timely manner.

(g) Every insurer shall provide written notice to its policyholders regarding the coverage required by this section. The notice shall be in writing and prominently positioned in any literature or correspondence sent to policyholders and shall be transmitted to policyholders beginning with calendar year 2022 when annual information is made available to policyholders or in any other mailing to policyholders, but in no case later than December 31, 2022.

(j) A bill or statement for services from any health care provider or insurer shall be sent directly to the person receiving the services.

(k) For purposes of this section, "contraceptive supplies" shall have the same meaning as in section 431:10A-116.6.
